

Test The Waters Kit **MATERIALS LIST**

The NLM_Cornerstones of Science *Test The Waters* Kit MATERIALS LIST consists of most kit items, quantities, costs and vendors should you want to replace, refurbish or replicate the kit. Each kit item has an associated weblink where you can either purchase or download additional items. All braille overlays found in this kit will NOT be available going forward as the NLM_Cornerstones of Science *Test The Waters* Kit is a limited edition, and created as part of National Institutes of Health and National Libraries of Medicine *All of Us* Research program's celebration of Citizen Science Month in April 2020. All costs highlighted in this list are approximate as prices have varied over time.

NOTE: As materials were bought in bulk to keep prices low to create this kit, individual items might be priced higher due to the purchasing of low quantities.

We hope your patrons and their families enjoy the exploration of the role and importance water plays in their lives.

Item	Description	Quantity	Cost	Vendor Weblinks
