

All *of* Us

RESEARCH PROGRAM

National Library
of Medicine

*Network of the National
Library of Medicine*

Data meets diversity.

The *All of Us* Research Program reflects the rich diversity of our country. It's what makes the program so unique.

All of Us aims to engage a community of participants that reflects the diversity of America, including many people who haven't taken part in medical research before. We welcome participants both healthy and sick, of all backgrounds and walks of life, from all regions across the country.

The more researchers know about what makes each of us unique, the more tailored our health care can become.

All of Us and the *All of Us* logo are service marks of the U.S. Department of Health and Human Services.
