**Intended Users:**

<table>
<thead>
<tr>
<th>Consumers</th>
<th>Healthcare Providers</th>
<th>Information Professionals</th>
<th>Researchers</th>
</tr>
</thead>
</table>

**Key Points:**
1. The NLM History of Medicine Division collects, preserves, and makes available documents, materials, records, and visuals pertaining to the history of medicine and the field of health science research.
2. The NLM History of Medicine Division curates’ presentations of selected items through continued study and interpretation of its rich historical collections.
3. The NLM History of Medicine Division has documents spanning several centuries, from around the globe, creating a rich and diverse historical medical collection.

**Potential Predicaments:**
1. The NLM History of Medicine Division works in conjunction with NLM Digital Collections and other NLM resources. While exploring the site, people may end up on their webpages.

**Teaching Examples:**
1. Have participants explore the “Circulating Now” blog. Search for the blog titled “Matters of the Heart.” The blog mentions numerous resources and collections. Look at the “Profiles in Science” section and pick one of the papers collections to explore.
2. Have participants explore the “Classics of Traditional Chinese Medicine” collection. Look through the section “Books on Display” and find a manuscript from the 1600s.

---

**NLM History of Medicine Collections**

**Description:** The NLM History of Medicine Division collects, preserves, makes available, and interprets for diverse audiences one of the world’s richest collections of historical material related to health and disease. Spanning 10 centuries, the collection encompasses a variety of digital and physical formats, originating from nearly every part of the globe. Collections include born digital content (which is content that is created in a digital format) such as blogs or websites, manuscripts, anatomical drawings and papers, audiovisuals, prints, and photographs.

**Popular uses of this product:**
