

Project Staff

Two Center of Excellence in Media for Youth team members will work on Media Health Effects:

Jane Doe, Librarian

Jane has over 9 years of experience in health sciences librarianship with a background in media and technology studies. As Jane is an embedded librarian within the Pharady Medical System, she has the supportive partnerships of the team of Center of Excellence in Media for Youth, Division of Adolescent and Young Adult Medicine, Pharday Children's Hospital, Pharady Medical School, and the ABC School of Public Health. With the assets of these institutions, she has the needed support to complete this project and the reach to disseminate our final product to a large and diverse audience. Jane will commit 10 hours per week to this project.

John Doe, Web Developer and UX Designer

John is a meticulous web developer with over 18 years of experience dedicating his career to designing web products and services for a variety of non-profits. John will commit 5 hours per week to this project.

Additional Info:

Both Jane & John have extensive experience writing, editing, and developing a wide variety of content for different audiences, and they have successfully co-managed grant-funded projects in the past. Jane and John will also be able to use editing equipment that is available from the Pharady Medical School to complete this project.

- For more information on project staff qualifications, please see Appendix 1: Project Staff CVs.
