

# NNLM *All of Us* Program Center Funded Projects

## Connecting People to Telehealth

Project Lead Organization: Lawton Public Library

Funding Year: 2021

Funding Amount: \$20,164

### Community Partners

Lawton Community Health Center  
Oklahoma Health Aging Initiative  
Oklahoma State University Extension  
First Christian

### Populations of Focus

Access to Care  
Annual Household Income  
Educational Attainment

### Project Goal

The Lawton Public Library intends to bridge the digital divide with telehealth kiosks and programming to improve individuals' access to health information.

### Project Summary

The Lawton Public Library (LPL) bridged the digital divide with a telehealth kiosk and programming to improve individuals' access to health information. The primary outreach was to the medically underserved members in Comanche County in Oklahoma. LPL requested funding to provide a telehealth kiosk in its main library to serve the public for doctor visits and health training. Due to unforeseen delays, the telehealth kiosk was delivered and set up in Summer 2022. The library telehealth team connected with Kathy Cooper from First Christian to create a partnership with their established homeless assistance programs for the use of the telehealth kiosk.

In addition to the kiosk, two community partners, the Oklahoma Healthy Aging Initiative and Oklahoma State University Extension office, presented 3 health literacy classes at the library. The presentations focused on talking to your doctor, taking medications safely, and healthy cooking. LPL also promoted *All of Us* and NLM resources like [MedlinePlus](#) as reliable health information for their community.

The most significant success of this project was continuing to make a positive impact on the community by providing healthy literacy for citizens of all ages. The Library constantly looks for ways to safely offer events and activities in a way that furthers the education and enjoyment of the community.

### Oklahoma

## Key Words

Telehealth

Health Literacy

Digital Literacy

## Project Highlights

- 3 health literacy workshops were presented to LPL's community, focused on doctor appointments, using medications safely, and health cooking.
- 3 community partnerships support past and ongoing project activities: the Oklahoma Health Aging Initiative, Oklahoma State University Extension, and First Christian.

## Cost Estimates

*This section gives you a general idea of what costs to expect when implementing a similar program. Current costs may vary.*

- Speaker honorariums (x3) - \$900
- Privacy booth - ADA compliant, installation included (x1) - \$19,000

## Recommendations

Prioritize connecting with established community partners who have relationships with the targeted audience for your project.
