Discussion Guide

Blood: The Science, Medicine, and Mythology of Menstruation
Dr. Jen Gunter

Kensington 2024 480 pages

ISBN: 9780806540689

Menstruation

Summary

Not knowing how your body works makes it challenging to advocate for yourself. Consequently, many suffer in silence thinking their bodies are uniquely broken, or they turn to disreputable sources. *Blood* is a practical, empowering guide to what's typical, what's concerning, and when to seek care—recounted with expertise and frank, fearless wit that have made Dr. Jen today's most trusted voice in gynecology. Dr. Jen answers period-related questions, including: What exactly happens during menstruation? How heavy is too heavy? How much should periods hurt? Legitimate menstrual products, and the facts behind toxic shock syndrome. (from the publisher)

Questions

- 1. What common myths about menstruation does this book address?
- 2. What kinds of stories did you hear about menstruation when you were a child?
- 3. Is social media a positive or negative tool for information about menstruation?
- 4. How do you think stories/myths about menstruation vary between cultures or countries?
- 5. How have societal views and conversations about menstruation changed over our lifetimes? What would you like the future of these conversations to look like?
